Features description	CEL-360X		CEL-360
measurement range (dB)	30 -140	40 –140	30 -140
pre-programmed setups ready for run	7	5	7
user programmable setups for special tasks	13	4	13
simultaneous measurements as 2 dosimeters	yes	yes	yes
maximum number of separate measurements	50	?	50
real time clock to tag runs in memory	Yes	Yes	Yes
customizable setup from computer	Option *	?	Yes
datalogging at regular intervals	Yes	Yes	Yes
logging interval timers	1 s to 1 hr	1 min only	1 s to 1 hr
maximum number of profile points stored	220,000	9600	220,000
number of parameters stored per profile interval	10	4	10
storage of statistical parameters	yes	yes	yes
delayed start and stop using built-in timers	Option *	Yes	16 sets
run for fixed duration then stop automatically	Option *	Yes	Yes
customization of measured parameters	Option *	?	Yes
direct output to printer	Yes	?	Yes
use as a sound level meter	Yes	Yes	Yes
customer selectable calibration level (dB)	Any	Any	Any
saves calibration data pre and post run	Yes	yes	Yes
user selectable ID# for instrument	Option *	?	6 digits
levels of security during run	2	2	2
battery life (hr)	50	70	50
size (in)	2.6 x 1.2 x 4.8	2.7 x 1.5 x 5.0	2.6 x 1.2 x 4.8
weight (oz)	11	14	11
windows software included	Option *	Option*	Standard
upgradable to higher model by software	Yes	Yes	Yes
instrument only price (\$)			
instrument kit inc. cal, windscreen, case less software and cable (\$)			
instrument kit inc. cal, windscreen, case including software and cable (\$)			

Note - information for above comparison taken from manufacturer's published brochures and liable to change without notice 02/05

Major benefits of CEL-360X

* Options above require software

- lower minimum noise level for community noise surveys
- more versatile with more data storage and setups
- can be used as a hand held sound level meter

Major benefits of CEL-360

- customizable from computer to suit requirements
- view profile results by downloading to std. software
- smaller, lighter, less obtrusive on wearer
